## Best time to send – Time and day analysis

---

### Challenge

Time and day analysis [TDA] predicts when to send emails to maximise impact. M&S Bank marketing department wanted to know when was the best time to send a newsletter in order to optimise overall engagement performance.

## Solution

Our data science team ran a time and day analysis (*TDA*) on the existing customer data. The team used a logistic regression model that takes real campaign data to predict results which then provides a 'score' for each cell (*hour and day*) and we used this score to create five different classes (*quantiles*):

- Very good
- Good
- Neutral
- Bad
- Very bad

From the predicted score, we take the mean within each class.

The output involved creating a reusable solution to dynamically send emails at the correct time based on segments using the 'best time to mail' information that was established. Allocated send times were incorporated into the campaign workflow and where there was not enough data for a customer they were flagged with the time that is identified as the best performing.

### We employed time and day analysis to determine the best time to send.

- Through TDA we looked at email campaign performance over time in order to determine when customers are more inclined to engage
- Provided TDA heat maps that were created to show optimal times to send

**Generated a 100% increase in engagement**  
(both opens and clicks)

**TDA has been rolled out across each product**

**This has now evolved into 'send time optimisation'**  
that will send at an individual customer's preferred time

# Wired to solve problems

**We're a clever team of specialists in data engineering, BI, data science and multi-channel marketing.**

Blending real 1:1 communications, AI, machine learning and human intelligence, we connect people with your brand.

We were the original UK partner for Adobe Campaign. We've nearly 20 years' experience in data management, automation and customisation of enterprise data management and marketing other platforms.

Fuelled by inquisitiveness, forward thinking and excitement at the advancements of technology, we're entrepreneurial, adventurous and we make stuff happen.

We help clients get under the skin of a human being's emotional narrative – their story – and see what's important to each customer.

Our clients trust us for our responsive, personal and upfront approach to help them create highly targeted, intelligent communications.

**Stay connected to discover more inspiring guides and stories within our 'knowledge think tank'.**
